PROFILE

Motivated and fast-learning Computer Science graduate with a strong foundation in software development and full-stack technologies. Experienced in building real-world web and mobile applications through academic and personal projects. Passionate about developing scalable, efficient, and user-friendly solutions. Seeking an entry-level position as a Software Developer or Full Stack Developer where I can contribute and grow.

PROJECTS

Modax Fashion Store (Web Application)

Dec 2025 - Jan 2026

- Developed a full-stack e-commerce platform using HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL
- Implemented user authentication (login/register), product management, and shopping cart system
- Utilized AJAX and JSON for dynamic content updates and improved user experience
- Designed a responsive and user-friendly interface optimized for different devices

Veloria Palace — Hotel Reservation Web Application

Nov 2025 - Jan 2026

- Built a full-stack hotel reservation system using PHP, MySQL, JavaScript, Bootstrap, AJAX, and JSON
- Developed a complete booking system allowing users to browse, select, and reserve rooms
- Implemented a user dashboard (My Account) and admin panel for managing bookings and room availability
- Focused on system organization, performance, and smooth user interaction

Currency Converter — Mobile Application (Java)

sep 2025 - Feb 2026

- Developed a mobile application using Java for real-time currency conversion
- Designed a clean and intuitive user interface with features like dark mode, notifications, and sharing
- Implemented additional functionalities including user profile, chat support, and pooling features
- Focused on usability, performance, and enhanced user experience
